Objective

This **Week 20 Graded Mini Project** asks you to build a **Flowise-powered jewellery retail chatbot** for a fictional brand, **Ornativa Jewels** (Hyderabad, India). The chatbot must answer customer questions by reading and using the product catalogue provided in **Jewellery Details.pdf**. The goal is to practise building a retrieval-based chatbot using a **visual pipeline** (document loading, chunking, embeddings, retrieval, prompting, memory, and testing) without relying on hard-coded answers.

Project Objective

Your objective is to create and test a **Jewellery Chatbot** that:

- answers customer questions using the catalogue content provided in **Jewellery Details.pdf**,
- supports follow-up questions using short-term conversation context (memory),
- remains polite, concise, and factual in tone,
- and suggests a relevant alternative when an item is out of stock (based on the catalogue).

Approach Followed for this Assignment

- Data is uploaded as per the Jewellery data which is given , I have also added few more records from Kaggle to have more robust data
- **Flow Wise was used as a LowCode Tool**
 - Account was created : <https://cloud.flowiseai.com/canvas/b1a07bf2-fce0-404e-8a5f-6ca314e1851a>
 - Flow was created
 - Flow diagram screenshot as below.
 - Upsert was used inside the Flow wise to attach and insert the data from Jewellery Details
 - Customize queries were executed for 5-10 queries
- **Data was store in PineCone Vector Store and Created an Index as below**
 - Index was Dense and Cosine
 - Embedding was higher one

 Get started

 Database

Quickstart

newpdfindex ⓘ

Record count 51 ● | Region  us-east-1 | Type Dense | Host newpdfindex-yiy5ibb.svc.aped-4627-b74a... 

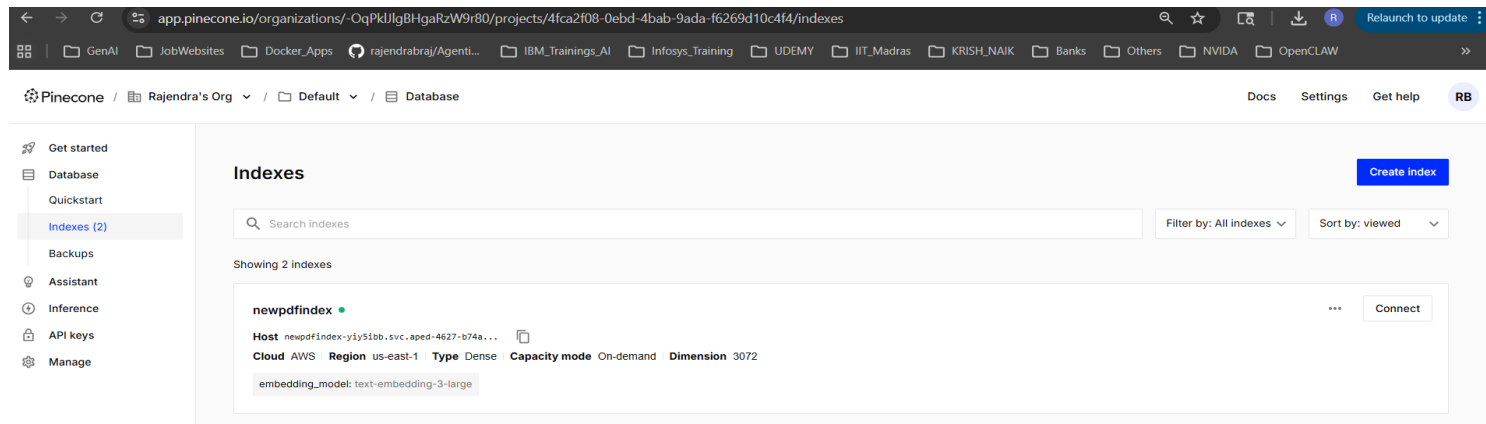

Index configured for **text-embedding-3-large**:

Modality	Text
Vector type	Dense
Max input	8,191 tokens
Dimension	3072 ▾
Metric	cosine ▾

•

Task 1 – Data Setup

- Refer to the Flow Diagram as attached
- Pinecone Account was Setup as a Vector Store
- Upsert was done for the Jewellery PDF
- <https://app.pinecone.io/organizations/-OqPkIJgBHgaRzW9r80/projects/4fca2f08-0ebd-4bab-9ada-f6269d10c4f4/indexes>
- Index was created for PineCone

Task 2 – Create the Query Chain - Refer to the Flow Diagram as attached

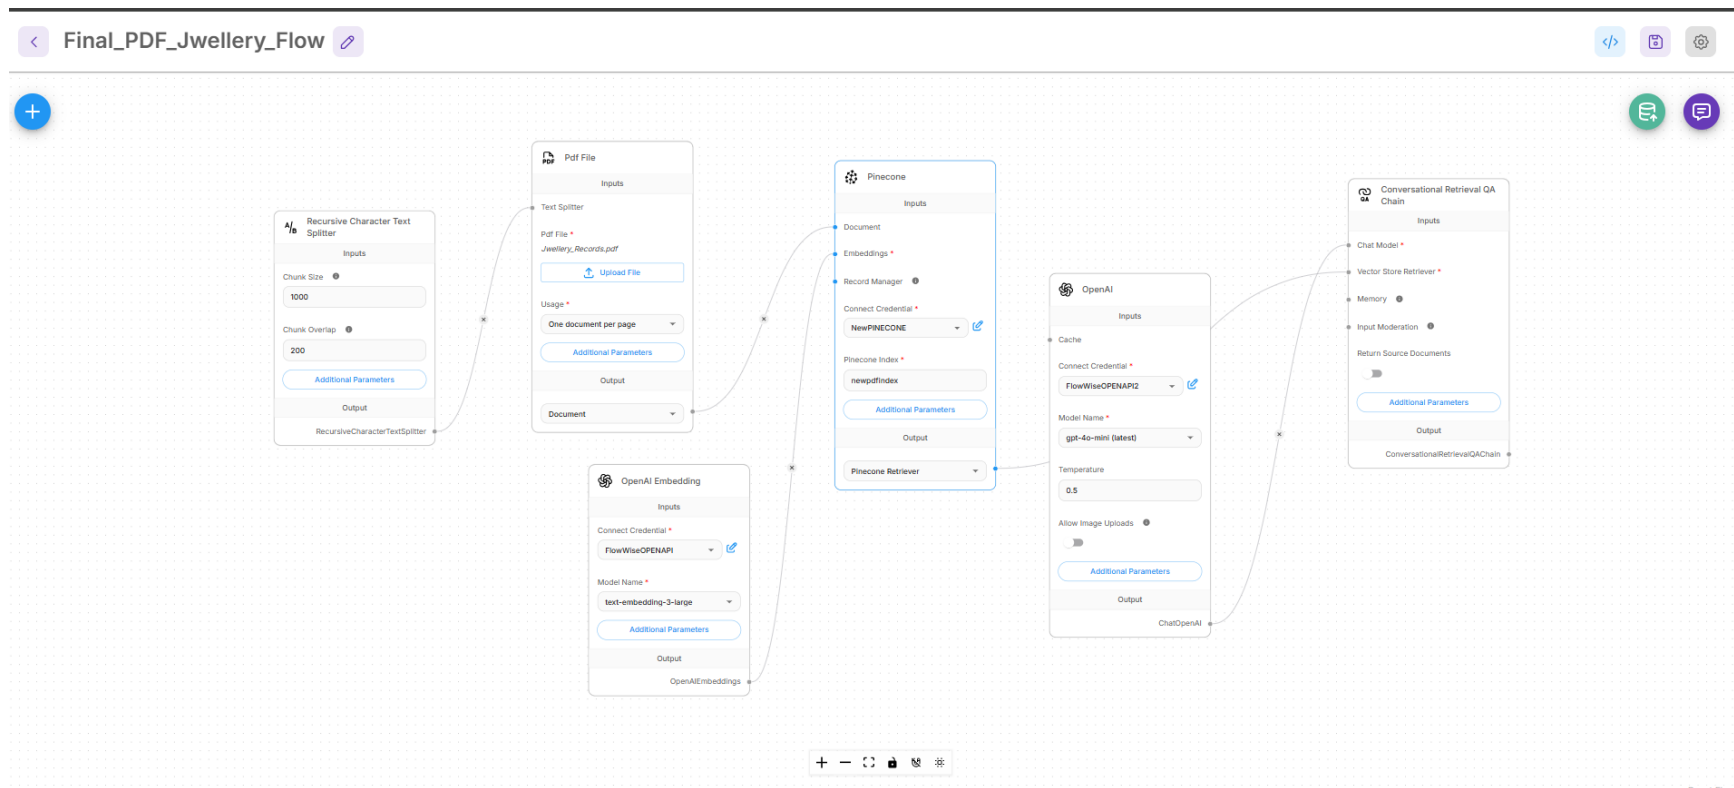

Task 3 – Add Conversational Memory - Refer to the Flow Diagram as attached

Task 4 – Customization and Testing (Results) are as attached below.

Refer to the Flow Diagram as attached

Deliverables

- **Flowise chatflow export** (JSON), or a clearly captured set of screenshots showing the full node pipeline and connections. (Added in the screenshot) (JSON I will also attach)

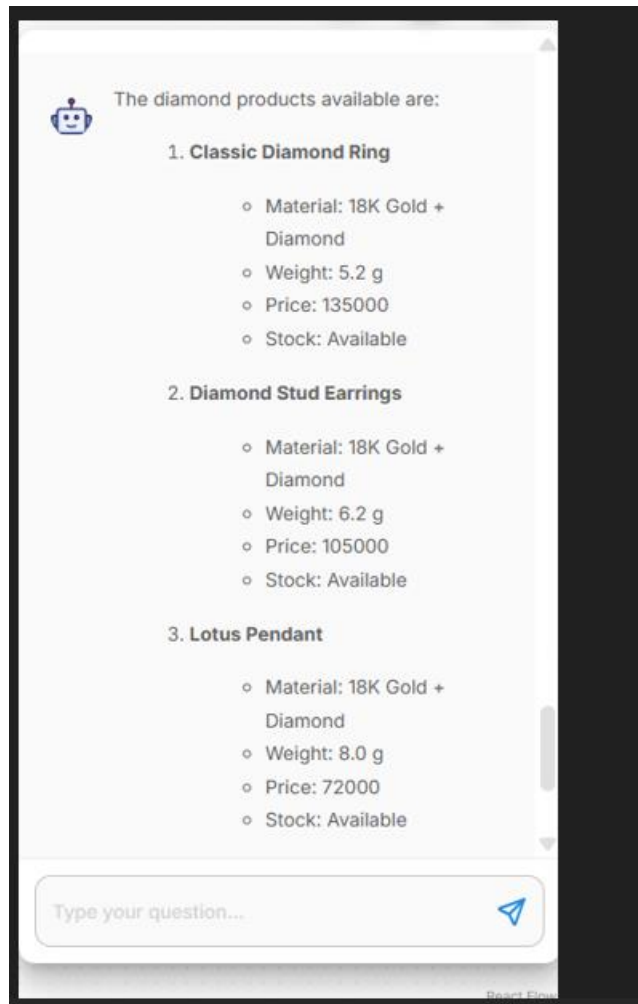

- **Test evidence:** at least **five** user queries with the chatbot's responses (screenshots or copied logs). (Added in the screenshot and text as below)
- **Short write-up** (README or PDF) describing: your node choices, chunking approach, prompt design, memory setup, and how you handled out-of-stock suggestions. (Approach as above and Summary)

Lessons Learnt were as below :

- I have explored FlowWise and N8n as both tools.
- Pinecone connectivity is not simple you have to have index configuration correct
- FlowWise allows you only max 2 flows in the Starter version (Free Version)
- Debugging in Flow wise is not very easier to perform within FlowWise
- N8n Debugging is easier, this can be an alternative tool
- Nodes connected are and their respective Roles in (FLOW WISE)
 - PDF file to attach and Upsert the records
 - Recursive Character Text Splitter to have 1000:200 Text Splitting
 - Open AI Embedding to have embeddings created
 - Pinecone as Vector Store
 - Conversational Retrieval QA Chain to Query the Chatbot to get Jewelry details
 - Please note I have added extra data also so that the data is more and Robust apart from existing records given, some improvisation.

Questions and the Answers as Captured

List all available diamond items

The available diamond items are:

1. Classic Diamond Ring

- Material: 18K Gold + Diamond
- Weight: 5.2 g
- Price: 135000
- Stock: Available

2. Diamond Stud Earrings

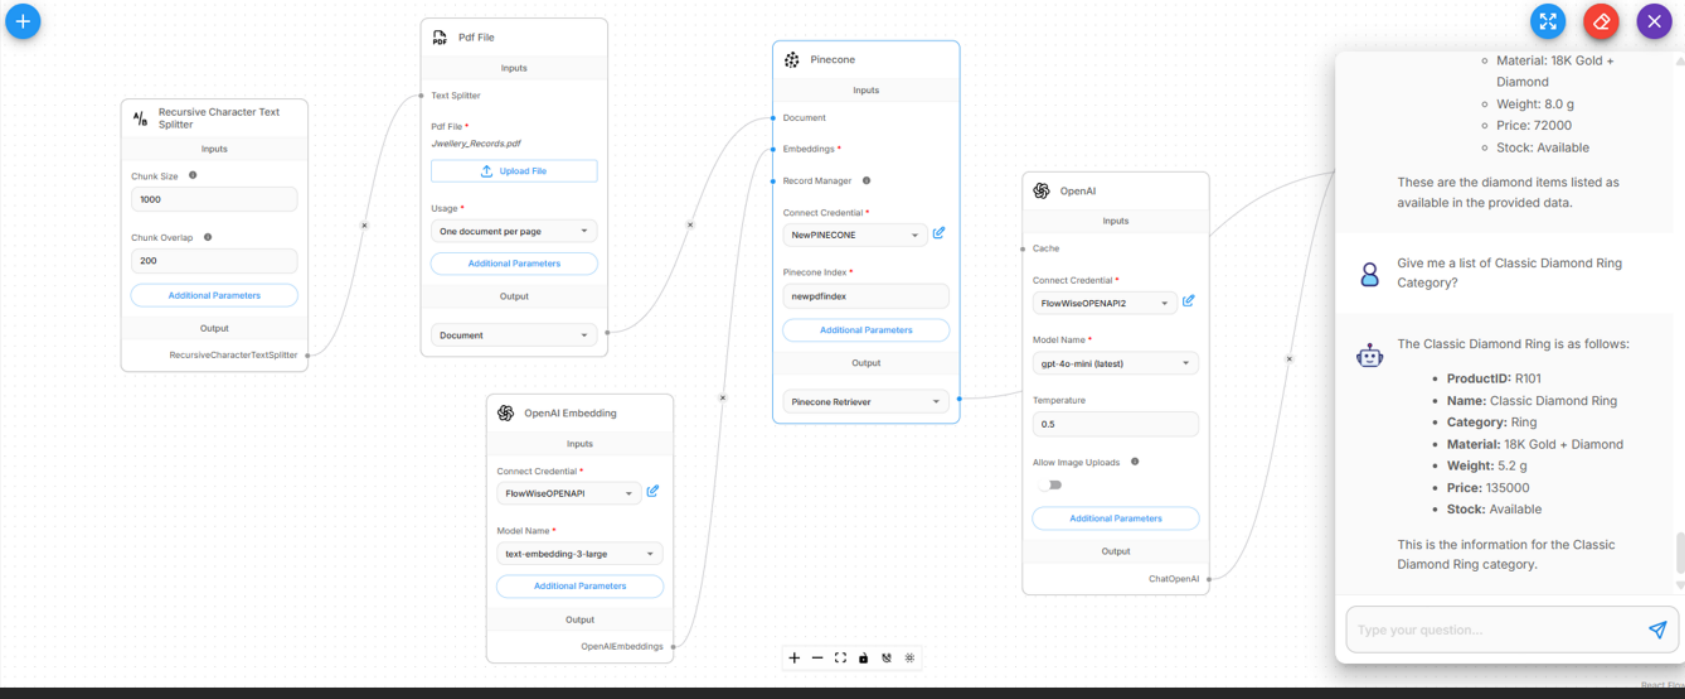

- Material: 18K Gold + Diamond
- Weight: 6.2 g
- Price: 105000
- Stock: Available

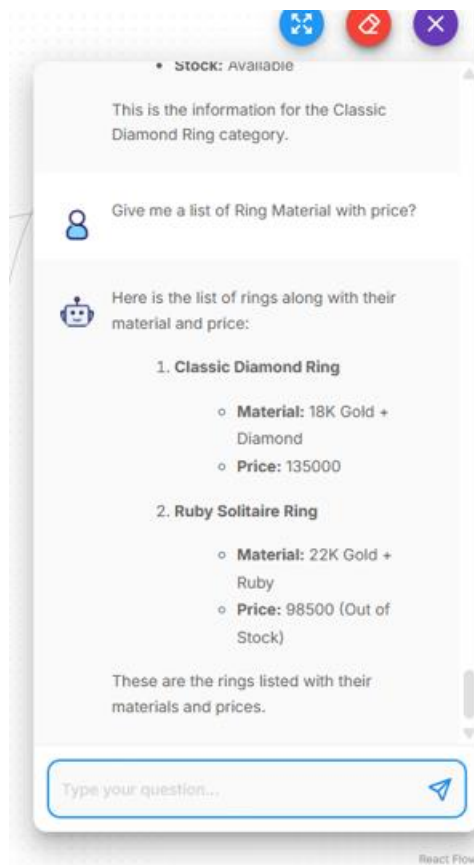

3. Lotus Pendant

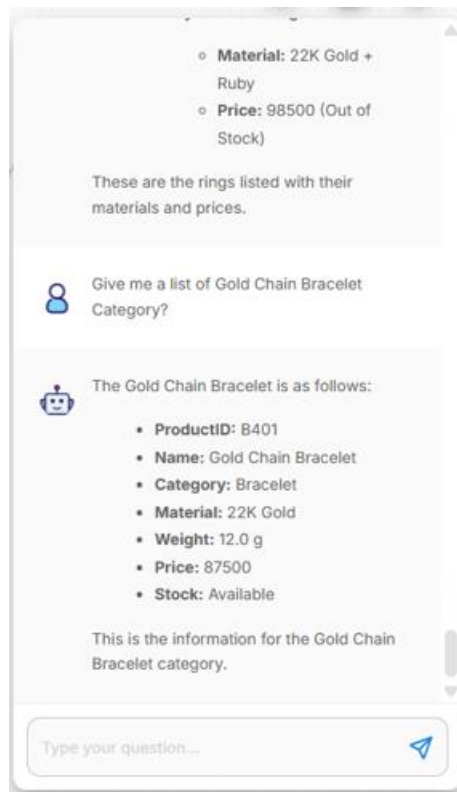

- Material: 18K Gold + Diamond
- Weight: 8.0 g

Type your question...

Questions and Answers as attached (ScreenShots)

what is the price of Double Butterfly Pendant ?

what is the price of Rose Pendant ?

what is the price of Kitty Pendant ?

Give me data about Rose Pendant , kitty Pendant, Double Butterfly Pendant?

show me classic diamond ring category

show me necklace material and chain materials

show me ring category all records

show me bracelet category

Give me a list of Classic Diamond Ring Category?

Give me a list of Ring Material with price?

Give me a list of Gold Chain Bracelet Category?

Give me a list of Emerald Cuff Bracelet Category?

Give me a list of Lotus Pendant Category?

Give me a list of Lotus Pendant Category with price?

You are Ornativa's virtual jewellery expert. Be polite, concise, and factual. Show me diamond products.

You are Ornativa's virtual jewellery expert. Be polite, concise, and factual. Do you have enough stock of diamond rings?

You are Ornativa's virtual jewellery expert. Be polite, concise, and factual. What's the price of the ring?

You are Ornativa's virtual jewellery expert. Be polite, concise, and factual. What is the price of the Pearl Necklace?

You are Ornativa's virtual jewellery expert. Be polite, concise, and factual. Which products are made of 22K gold?

Show me diamond products

What's the price of the ring?

List all available diamond items.

What is the price of the Pearl Necklace?

Which products are made of 22K gold?

Do you have platinum bangles?

Do you sell watches?

Task 4 – Customisation and Testing

Text output of the chatbot is copied here as below for questions asked and data retrieved

Customise the system prompt to reflect the brand's tone, e.g.:

"You are Ornativa's virtual jewellery expert. Be polite, concise, and factual."

Test at least five queries, including price, material, category, and stock-related questions.

If an item is out of stock, configure the chatbot to suggest an alternative product. Example:

"Ruby Solitaire Ring is currently out of stock. You may like the Classic Diamond Ring instead."

Flow Wise Queries (Testing)
